Reasoning 1

Elouise thinks that she has underlined the determiner in the sentence below.

There are six swans swimming in the lake.

Is she correct? Explain your answer.

Reasoning 1

Elouise thinks that she has underlined the determiner in the sentence below.

There are six swans swimming in the lake.

Is she correct? Explain your answer.

No, Elouise is incorrect because...

Reasoning 1

Elouise thinks that she has underlined the determiner in the sentence below.

There are six swans swimming in the lake.

Is she correct? Explain your answer.

No. Elouise is incorrect because the determiner is six. Six comes before the noun and determines how many swans there are.

Reasoning 2

If you replace the word 'ten' for 'many' in the sentence below, will the sentence still make sense?

**There are ten sausages
sizzling in a pan.**

Explain your answer fully.

Reasoning 2

If you replace the word 'ten' for 'many' in the sentence below, will the sentence still make sense?

**There are ten sausages
sizzling in a pan.**

Explain your answer fully.

The sentence would still make sense because...

Reasoning 2

If you replace the word 'ten' for 'many' in the sentence below, will the sentence still make sense?

**There are ten sausages
sizzling in a pan.**

Explain your answer fully.

The sentence would still make sense because 'many' and 'ten' are both quantifying determiners. They both express the quantity but 'many' is less specific.
