

Homework Grid - Year 3 Summer Terms 5 and 6

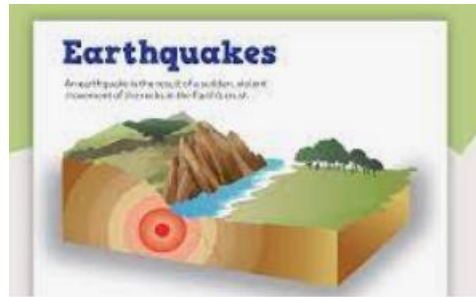

Choose one of the six homework ideas below to do as your Topic homework for both the Summer terms (one for each term is the minimum, if you'd like to do more than one grid you're more than welcome to). The following websites have lots of information about Earthquakes and Volcanoes:

<https://www.natgeokids.com/> <https://www.bbc.co.uk/bitesize> <https://kids.britannica.com/>

1. **Create a volcano fact file.** Choose a volcano, do some research and produce a fact file about it. How big is it? Where is it? Is it active? When did it last erupt? Are there any interesting facts or legends associated with it? Make sure you include some pictures! (These can be your own art work.)

2. **Design a poster explaining how earthquakes happen.** Remember to include a labelled diagram.

3. **Write and/or record a breaking news report about an earthquake.** Do some research about places that experience earthquakes to decide where to set your report. Remember to answer these questions: What is happening? - Where is it happening? - Why is it happening? - Who does it affect? - When is it likely to stop/happen again?

4. **Make a set of Top Trumps cards for different Mountains.**

5. **Create a 3D model of a volcano.** This could take whatever form you like, junk, papier maché, clay or play-doh. You could even make a cake! Be as creative as you like.

6. **Research Sir Edmund Hillary and write a diary entry about the moment he reached the summit of Mount Everest.**
