

Welcome to Bumblebees Class

All about Bumblebees

In Bumblebees, we believe that creativity blossoms when children are free to explore, experiment, and get delightfully messy. Through playful, hands-on activities, we encourage little ones to express themselves. But it's not just about fun; we're also deeply committed to nurturing a love and respect for the environment.

All about Mrs Morgan

I love EYFS! There is nothing better than watching your children's minds grow, explore and shine! As a parent of two of my own early years age children, one of my favourite things to do is share stories with them. Here in Fireflies, we are especially passionate about saving the world, and we proactively learn about how to take care of our planet, be kind to nature and become sustainable superstars!

All about Mrs Hooper

I absolutely love working in reception and being part of the children's first steps of their school journey, helping them build relationships, confidence and resilience and the foundations of their learning. Away from school I have a busy home life with 2 boys who keep me very active. Spending time with my family is important to me and we love days out together as well as watching them in their sporting clubs.
