

Name: _____

Number of Questions: **60**

Testing: **2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 11x, 12x** (with **inverse**)

$54 \div 9 = \underline{\quad}$ $11 \times 3 = \underline{\quad}$ $12 \times 6 = \underline{\quad}$ $72 \div 9 = \underline{\quad}$

$5 \times 8 = \underline{\quad}$ $5 \times 10 = \underline{\quad}$ $11 \times 4 = \underline{\quad}$ $18 \div 2 = \underline{\quad}$

$11 \times 12 = \underline{\quad}$ $6 \times 5 = \underline{\quad}$ $9 \times 7 = \underline{\quad}$ $2 \times 3 = \underline{\quad}$

$25 \div 5 = \underline{\quad}$ $1 \times 11 = \underline{\quad}$ $5 \times 10 = \underline{\quad}$ $9 \times 10 = \underline{\quad}$

$10 \times 12 = \underline{\quad}$ $4 \times 5 = \underline{\quad}$ $10 \times 6 = \underline{\quad}$ $60 \div 6 = \underline{\quad}$

$8 \times 11 = \underline{\quad}$ $4 \times 3 = \underline{\quad}$ $132 \div 12 = \underline{\quad}$ $7 \times 8 = \underline{\quad}$

$1 \times 8 = \underline{\quad}$ $6 \times 4 = \underline{\quad}$ $9 \div 3 = \underline{\quad}$ $8 \times 9 = \underline{\quad}$

$11 \times 10 = \underline{\quad}$ $3 \times 11 = \underline{\quad}$ $4 \times 10 = \underline{\quad}$ $72 \div 8 = \underline{\quad}$

$108 \div 9 = \underline{\quad}$ $4 \times 11 = \underline{\quad}$ $20 \div 10 = \underline{\quad}$ $42 \div 6 = \underline{\quad}$

$4 \times 1 = \underline{\quad}$ $9 \times 4 = \underline{\quad}$ $5 \times 9 = \underline{\quad}$ $7 \times 10 = \underline{\quad}$

$35 \div 5 = \underline{\quad}$ $2 \times 2 = \underline{\quad}$ $3 \div 3 = \underline{\quad}$ $3 \times 10 = \underline{\quad}$

$88 \div 11 = \underline{\quad}$ $8 \times 5 = \underline{\quad}$ $36 \div 12 = \underline{\quad}$ $2 \times 12 = \underline{\quad}$

$3 \times 6 = \underline{\quad}$ $96 \div 8 = \underline{\quad}$ $1 \times 4 = \underline{\quad}$ $48 \div 4 = \underline{\quad}$

$8 \div 2 = \underline{\quad}$ $8 \times 12 = \underline{\quad}$ $56 \div 7 = \underline{\quad}$ $7 \times 4 = \underline{\quad}$

$10 \times 5 = \underline{\quad}$ $8 \times 6 = \underline{\quad}$ $6 \times 2 = \underline{\quad}$ $2 \times 7 = \underline{\quad}$
